TRUKINETICS

SURVEILLANCE OPERATIONS

Training for Law Enforcement by Law Enforcement

Dates	January 25 – 29, 2027
Location	Multiple venues, Phoenix AZ – to be announced upon registration
Cost	$1250
Audience	Open to all law enforcement personnel

Course Overview

The Surveillance Operations course will prepare law enforcement officers for information gathering, case building, as well as preparing for apprehensions. This course will cover the necessary tradecraft to efficiently conduct surveillance of the criminal element that takes active measures to avoid detection. Techniques will cover mobile and on-foot scenarios, challenging the student in difficult environments. Communication and the ability to be flexible is paramount for successful follows. This course is applicable to all law enforcement officers who are tasked with locating, surveilling, developing cases, and planning apprehensions. If you are an officer seeking a position on a unit tasked with these operations, or just looking to develop your skillsets, this will be a highly beneficial training opportunity.

Required Gear

- Unmarked vehicle – no loud or outstanding colors
- Camera / video recorder
- Changes of clothes to blend into a variety of environments
- Computer with Microsoft Office
- Smart phone
- Note taking material

Instructor Background

Instructors: Your TruKinetics instructors bring an exceptional level of operational experience and passion for teaching the new generation of Law Enforcement officers.

Marty comes with an extensive background with the US Army Special Forces, being a member of a highly regarded Special Missions Unit, conducting singleton operations in some of the most austere environments and war zones. Marty's experience with critical information gathering, surveillance, counter-surveillance and other activities supporting intelligence and kinetic operations is second to none. Marty is also a current law enforcement officer.

Jeremy offers his knowledge from over 25 years of high-threat, low-profile protection operations for our country's intelligence operations, surveillance / counter-surveillance of terrorist targets and medical support roles within the SOF community. Jeremy also currently teaches tradecraft within the clandestine community.
